New Vision statement

- To be the voice for Nursing Informatics in Canada

CNIA Mission

Current

- The mission of the CNIA is to be the voice for Health Informatics in Canada. (or)
- To be the voice for Nursing Informatics in Canada.

New

- The mission of the CNIA is to enable the improvement of Nursing through the use of evidence-based practice using Nursing Informatics, Information Technology and Information Management.

CNIA
Canadian Nursing Informatics Association

Goals 2011-12

Defined Goals

1. **Influence and advance** the use of nursing informatics and nursing data standards.
2. **Connect** nurses and health professionals from across the country for a purpose of improving best practice.
3. **Support** nurses in practice and education by providing resources for the advancement of nursing informatics competencies via training, toolkits, standards and communities of practice. (change management, project management, IT skills, information management skills, business analysis).
4. **Establish best practices** in clinical IT and information management

CNIA
Canadian Nursing Informatics Association

Strategies 2011-12

1. Increase engagement with and increase value for membership
2. Increase membership through marketing, communication and alignment with informatics community
3. Connect with and support the Provincial NI Groups to leverage work and enthusiasm in the local level
4. Create a leadership role for CNIA by NI2012
5. Connectivity and integration for nurses working in the informatics field
6. Create structures/committees to allow interested work to progress including focus on nursing data standards.
7. Roles and responsibilities of the Board be empowered to Lead

CNIA
Canadian Nursing Informatics Association

Key Projects

1. Increase engagement & value for membership by Fall 2011
2. Increase membership by Fall 2011 AGM
3. Create structures to progress work
4. Provide opportunities for connectivity & sharing for NI
